The Dynamic Earth. If you have ever been to Hawai'i, you may have had the opportunity to snorkel. People are attracted to this activity because it gives you a small glimpse of the interesting ...

Volcano

A volcano is a rupture in the crust of a planetary-mass object, such as Earth, that allows hot lava, volcanic ash, and gases to escape from a magma chamber below the surface.. Earth's volcanoes occur because its crust is broken into 17 major, rigid tectonic plates that float on a hotter, softer layer in its mantle. Therefore, on Earth, volcanoes are generally found where tectonic plates are ...

Study Guide Main List

The four most-asked questions have been taken from the popular Answers Book and originally made into an attractive, oversized booklet (passed out at the Sydney 2000 and Athens 2004 Olympics). Answers the questions: Does God exist? Who was Cain's wife? How did all the races get here? and Does evolution explain our existence?

Scientific opinion on climate change

Scientific consensus. In contrast to the "scientific opinion on climate change", a related—but not identical—term, "scientific consensus on climate change", is the prevailing view on climate change within the scientific community.. The current scientific consensus is that: Earth's climate has warmed significantly since the late 1800s.

Is Christianity True? Evidence for the Truth of the ...

Part 2 of the introduction for non-believers provided a survey of the evidence suggesting that the universe was designed by an intelligent agent. I came to that conclusion in 1973 as a result of my studies as an undergraduate at the University of Southern California (not exactly a bastion of religious fervor).
