How to Identify an Unknown Bacteria in Microbiology ...

Begin the process of identifying unknown bacteria by observing their physical characteristics, such as cell wall, shape and linkages. Use standard laboratory procedures, like cell staining, culturing and DNA sequencing to further narrow down your identification.

IDENTIFICATION OF UNKNOWN BACTERIA

IDENTIFICATION OF UNKNOWN BACTERIA It is virtually impossible to identify bacteria based on physical characteristics alone. This is due to the fact that there are only a few basic shapes and physical features commonly seen in the prokaryotic world. Instead, biochemical testing has been used to make bacterial

Any Hints for Microbiology "Unknown"?

We are starting our unknown lab this week and we each will get 2 types of bacteria that we need to identify on our own. I plan on doing a gram stain for each, then do streak plates w/selective media. Does anyone have any hints? I did find a website that you can put info into it and it will narrow...
